*Special Offer Good Until May 1, 1928*

The New England Gladiolus Society offers a collection of twelve Gladiolus Bulbs, all different, value \$2.00 to each NEW MEMBER who sends in his \$1.00 before May 1, 1928.

The 1928 Year Book is ready for you. Send us your check for \$1.00 payable to David Tyndall, Secretary, and we will send you six bulbs of Cinderella in addition to the above offer.

MRS. F. C. PETERS

a rose lilac with amaranth purple blotch; with 5 to 7 open. It is late season but a wonderful flower and well worth waiting for.

If you are interested in some variety in several sizes and bulblets, write for special prices. Many small lots not listed are available.

One dozen at ten times the single rate, six at one-half the dozen rate.

We do not substitute unless requested to do so and if variety is sold out will return your remittance promptly.

Terms, Cash with order or sent C. O. D. Postage prepaid on orders of \$2.00 or more.

Full cultural directions enclosed in each order.

We appreciate and thank you for your orders and will do everything possible to deserve your continued confidence. If we make a mistake, tell us and see if we mean the above statement.

## Greetings, "Glad" Friends:

In offering this list of choice Gladiolus for 1928, containing about 160 varieties, we make no apology for including many varieties that are cheap in price, these have been propagated long enough to be plentiful.

A study of the list of the winning varieties at the shows reveals the surprising fact that a big percent of these cheaper kinds are winning consistently. Price indicates a scarcity or plentiful supply, in large measure.

Beautiful effects in the flower garden and home may be secured at small cost with the Gladiolus. It grows and blooms profusely on any soil if in full sunlight.

The primulinus types are growing in popularity—these dainty colored flowers are ideal for home decoration. Two or more kinds can be used together, the soft color shades blending beautifully. If you want something unusually lovely for home decoration, do not neglect to grow "Prims."

### EXPLANATION

Prices are quoted in two sizes where possible. Large means  $1\frac{1}{4}$  in. or larger and small will be from  $\frac{3}{4}$  to  $1\frac{1}{4}$  in. The smaller bulbs will produce bloom slightly smaller than the large, in most cases, but will produce more bulblets.
